Power Save Mac Feature History

Version 3.00

- **Consolidated Reporting**

Power Save now features the ability to generate one Power Save report for both PC and Mac deployments through Faronics Core Console. Also, Energy Consumption Profiles are now pre-populated in the Power Save Loadin.

- **Improved Power Save Mac Report Generator**

The Power Save Mac Report Generator can now communicate via TCP/IP in addition to Bonjour, which means workstations can now communicate to the Report Generator across subnets.

- **Licensing**

Users can now purchase and enter a license key to convert their evaluation deployment into a purchased deployment.

- **Enhanced Reporting**

Power Save Mac's report template has been updated to match the Power Save report generated by Power Save for Windows. This also means the Power Save Mac report features the Eco-Savings box.

Version 2.02

- Improved French, German, Japanese, and Spanish localizations
- Added additional machine/display types

Version 2.00

- Compatible with Mac OS X 10.5 Leopard
- Compatible with Deep Freeze Mac 4.x
- Central network reporting capability

Version 1.50

- Computer, display, and hard drive sleep setting options
- Intelligent inactivity settings based on CPU usage, network usage, hard disk usage, and important applications
- Scheduled start-ups, shut downs, sleeps, and wakes
- Auto-cancel of scheduled events if computer is active
- Customizable user warning times
- User-cancellable shutdowns option
- Multiple-user auto-cancel of shutdown option
- Automatic start-up prior to Deep Freeze maintenance window

- Check for updates capability
- Additional Apple Remote Desktop (ARD) tasks

Version 1.10

- Additional Apple Remote Desktop (ARD) tasks
- User-override option that gives administrators the choice to either execute Power Save Mac tasks regardless of user activity, or to allow users to override scheduled actions to avoid losing changes when multiple users are logged in or documents are left open or unsaved on the desktop
